Dear Fellow Investor,

The table below shows performance figures for the first half of 2025 and the cumulative and annualised performance of the Fundsmith Equity Fund – a sub fund of the Fundsmith Sicav ('Fund' or 'Sicav') and various comparators. Please note the differing start dates for the various share classes, noted below the table.

The T Class Accumulation shares in Euros fell -5.2% in the first six months of the year, 1.8 percentage points less than what is perhaps the most obvious comparator — the MSCI World Index (€ net). (Note

we do not hedge currency exposure and so the main difference in performance between the different currency share classes is due to currency movements in the period. These currency movements also impact the performance of the comparator, MSCI World Index.)

What did well for us in the first six months of 2025? Here are the five biggest positive contributors to performance:

Stock	Attribution
Philip Morris	+1.6%
Meta Platforms	+1.1%
IDEXX	+0.6%
L'Oréal	+0.5%
Microsoft	+0.4%

Source: Northern Trust

As ever, we continue to make money with old friends.

The five biggest detractors from our Fund's performance during the period were:

Stock	Attribution
Novo Nordisk	-1.8%
LVMH	-1.1%
Waters	-0.7%
Church & Dwight	-0.7%
Alphabet	-0.6%

Source: Northern Trust

Novo Nordisk alone accounted for all the underperformance during the period. Its ability to snatch defeat from the jaws of victory in respect of its leadership in weight loss drugs continues to be remarkable. Its inability to deal with the US legal and regulatory system's approach to its success would be interesting to observe from a safe distance.

Novo is controlled by a foundation which we have seen as a strength in terms of its ability to make good long-term decisions. It has now fired its CEO. We wait with increasingly thin patience to see whom it appoints as replacement and what changes they bring.

Another adverse factor affecting our Fund's performance has been the US Dollar. The majority of the companies we invest in are based in the United States, report in US Dollars and more importantly have the majority of their revenues in this currency. Therefore the move in the Euro vs US Dollar exchange rate from \$1.04 at the beginning of the year to \$1.17 at the end of June (12% depreciation) has had a major effect. This can be seen in the fact that the US Dollar denominated share class (I Acc USD) was up by 6.8% in the first half

of 2025. I doubt this performance by the Dollar relative to the Euro is a reflection of the strength of the Eurozone economy, and in fact the USD Trade Weighted Index has fallen by around 7.5%.

I have no clue if or when this will reverse but would merely observe that the apparent policy aims of the Trump administration — reducing the US trade deficit and lowering interest rates — are incompatible with a strong Dollar. But equally the course of events in the Eurozone do not suggest to me that the Euro is likely to see continued strength either.

We prefer not to update the valuation at this stage of the year as although share prices are certain, the free cash flow ('FCF') on which we base our valuation has elements of seasonality so we will leave it until the year end to update the portfolio valuation.

During the period we began accumulating stakes in Zoetis, the animal health company, Intuit, the accounting software business and EssilorLuxottica the global eyewear manufacturer and we sold our positions in PepsiCo and Brown-Forman. As a result our portfolio turnover in the first half was 8.9% and the voluntary dealing (dealing not caused by redemptions or subscriptions) cost €0.5m during the half year (0.006% or 0.6 of a basis point). The Ongoing Charges Figure for the T Class Accumulation shares was 1.08% and with the cost of all dealing added, the Total Cost of Investment was 1.10%.

We continue to invest with the aim of long-term superior performance adjusted for risk and thank you for your continued support.

Yours sincerely,

Teny Smith

The Fund is not managed with reference to any benchmark, the above comparators are provided for information purposes only.

The T Class Accumulation shares in Euros fell 9.5% in the first six months of the year, 6.1 percentage points less than what is perhaps the most obvious comparator — the MSCI World Index (€ net). (Note we do not hedge currency exposure and so the main difference in performance between the different currency share classes is due to currency movements in the period. What did well for us in the first six months of 2025? Here are the five biggest positive contributors to performance:

Visa	+0.1%

The five biggest detractors from our Fund's performance during the period were:

Stock	Attribution
Novo Nordisk	-1.2%
Greggs	-1.2%
Church & Dwight	-1.1%
Coloplast	-0.8%
Waters	-0.8%

Source: Northern Trust

Novo Nordisk alone accounted for almost one fifth of the underperformance during the period. Its ability to snatch defeat from the jaws of victory in respect of its leadership in weight loss drugs continues to be remarkable. Its inability to deal with the US legal and regulatory system's approach to its success would be interesting to observe from a safe distance.

Another Danish medical company, Coloplast, was also amongst our largest detractors. Together with Novo they accounted for one third of the underperformance. Coloplast was a company whose revenue growth rate was metronomic. Probably not coincidentally, following two major acquisitions, it has encountered a series of operational failures.

Both Novo and Coloplast are controlled by foundations which we have seen as a strength in terms of their ability to make good long-term decisions. Both have now fired their CEOs. We wait with increasingly thin patience to see whom they appoint as replacements

and what changes they bring.

Another adverse factor affecting our Fund's performance has been the US Dollar. The majority of the companies we invest in are based in the United States, report in US Dollars and more importantly have the majority of their revenues in this currency. Therefore the move in the Dollar from \$1.04 at the beginning of the year to \$1.17 at the end of June (12% depreciation) has had a major effect. This can be seen in the fact that the US Dollar denominated share class (I Class Accumulation) was up by 2% in the first half of 2025. I doubt this performance by the Dollar relative to the Euro is a reflection of the strength of the Eurozone economy, and in fact the USD Trade Weighted Index has fallen by around 7.5%.

I have no clue if or when this will reverse but would merely observe that the apparent policy aims of the Trump administration — reducing the US trade deficit and lowering interest rates — are incompatible with a strong Dollar. But equally the course of events in the Eurozone do not suggest to me that the Euro is likely to see continued strength either.

At this point in 2024, 68% of the portfolio had externally Science-Based Targets initiative (SBTi) approved emission reduction targets aligned with the goal of keeping global warming within 1.5°C of preindustrial levels, also known as the 'Business Ambition for 1.5°C'. This year, we are pleased to report that 73% of the portfolio is now aligned with that goal, with an additional 14% in the process of establishing targets with the SBTi. This compares to just 14% of listed companies globally¹. Further, 79% of the Fund's emissions are covered by a committed to reaching net zero emissions by 2050 at the latest. This is a decrease on last year's proportion as some of the Fund's companies had their commitments removed by the SBTi due to issues relating to scope 3 emission reductions. We continue to track the progress companies in the portfolio make toward their net zero goals and engage with those who still make a material contribution when necessary.

We prefer not to update the valuation at this stage of the year as although share prices are certain, the free cash flow ('FCF') on which we base our valuation has elements of seasonality so we will leave it until the year end to update the portfolio valuation.

During the period we began accumulating stakes in Intuit, the accounting software business and EssilorLuxottica the global eyewear manufacturer. No positions were exited. As a result our portfolio turnover in the first half was 9.1% and the voluntary dealing (dealing not caused by redemptions or subscriptions) cost €56k during the half year (0.016% or 1.6 basis points). The Ongoing Charges Figure for the T Class Accumulation shares was 1.11% and

with the cost of all dealing added, the Total Cost of Investment was 1.16%.

We continue to invest with the aim of long-term superior performance adjusted for risk and thank you for your continued support.

^{**} Share class became dormant on 6 March 2024 and was relaunched on 1 April 2025.

Notes to the Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

(b) Foreign Currency Translation

Transactions and Balances

Foreign currency transactions are translated into the reference currency using the exchange rates prevailing on the dates of the transactions. Foreign currency assets and liabilities are translated into the base currency using the exchange rate prevailing at the Statement of Net Assets date and are detailed in Note 7.

Foreign exchange gains and losses arising from translation are included in the Statement of Operations and Changes in Net Assets.

(c) Valuation of Investments, Assets and Liabilities

The SICAV's investments, assets and liabilities are valued as follows:

(i) Investment Securities Valuation

In calculating a net asset value, the Administrator may consult the Management Company and the Investment Manager with respect to the valuation of certain investments. Whilst there is an inherent conflict of interest between the involvement of the Management Company/Investment Manager in determining the valuation price of the Sub-Funds' investments and the Management Company's/Investment Manager's other duties and responsibilities in relation to a Sub-Fund, the Management Company/Investment Manager will endeavour to resolve any such conflict of interest timely and fairly and in the interest of Shareholders.

The value of securities which are listed or dealt in on any stock exchange is based on the last available price at the point as at which the net asset value is determined.

The Board of Directors of the SICAV may adjust the value of any investment if having regard to its currency, marketability, applicable interest rates, anticipated rates of dividend, maturity, liquidity or any other relevant considerations, and deem such adjustment is required to reflect the fair value thereof.

Where the value of any investment is not ascertainable as described in the Articles, the value shall be the probable realisation value estimated by the Board of Directors of the SICAV, or by a competent person, with care and in good faith.

If the Board of Directors of the SICAV deems it necessary, a specific investment may be valued under an alternative method of valuation chosen by the Board of Directors of the SICAV.

(ii) Cash at Bank

Cash at bank includes cash on hand or on deposit valued at its nominal/face value.

(iii) Assets

Assets, which include dividend income receivable, securities sold receivable, subscriptions receivable and prepaid expenses, are valued at nominal value unless it appears unlikely that such nominal amount is obtainable.

(iv) Liabilities

Liabilities, which include expenses payable and redemptions payable, are valued at nominal value.

(d) Bank Interest

Bank interest pertains to interest income from cash at bank. It is accrued on a daily basis and is disclosed in the Statement of Operations and Changes in Net Assets as net bank interest.

(e) Bond Interest

Bond interest is accrued on a daily basis, net of withholding tax.

Notes to the Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

(f) Dividend Income

Dividends are recognised on the date on which the shares concerned are quoted "ex-dividend", net of withholding tax.

(g) Due from/to Brokers

Balances due from/to brokers may include amounts receivable/payable for securities sold/purchased but not yet settled and unrealised gain/loss on spot contracts.

(h) Distributions

The SICAV may issue accumulation and/or income shares within each Sub-Fund. Accumulation shares do not pay any dividends whereas income shares give their owners the right to receive distributions.

(i) Total Net Asset Value

The total net asset value is equal to the difference between the total assets and the total liabilities of each Sub-Fund and the total net asset value of each share class is expressed in the reference currency of the relevant share class.

The net asset value per share is calculated as of each valuation day by dividing the total net asset value attributable to a share class by the total number of shares in issue or deemed to be in issue in that share class as of the relevant valuation day and rounding down the resulting total to two decimal places or such number of decimal places as the Board of Directors of the SICAV may determine.

(j) Transaction Costs

Transaction costs represent costs incurred by the SICAV in relation to the purchase and sale of transferable securities. Direct transaction costs are included in the net realised gain/loss and net change in unrealised gain/loss balances on investments in the Statement of Operations and Changes in Net Assets. They include fees and commissions paid to agents, advisers, brokers and dealers. Indirect transaction costs, charged by the Depositary for the execution of the SICAV's transactions, are included in the Depositary fees in the Statement of Operations and Changes in Net Assets. Direct and indirect transaction costs for the period ended 30 June 2025 are disclosed in Note 6.

(k) Swing Pricing

A Sub-Fund may suffer a reduction in value of its investments as a result of the transaction costs incurred in the purchase and sale of its underlying investments and of the spread between the buying and selling prices of such investments caused by subscriptions, redemptions and/or conversions in and out of the Sub-Fund. This is known as "dilution". In order to counter this and to protect Shareholders' interests, the Board of Directors may decide to apply "swing pricing" as part of the valuation policy. This will mean that in certain circumstances the Board of Directors may make adjustments in the calculations of the net asset values per share, to counter the impact of dealing and other costs on occasions when these are deemed to be significant.

If on any valuation day the aggregate value of transactions in shares of a Sub-Fund results in a net increase or decrease of shares which exceeds a threshold of 5% of such Sub-Fund's net asset value (relating to the cost of market dealing for that Sub-Fund), the net asset value of the Sub-Fund will be adjusted by an amount (not exceeding 0.25% of the net asset value) which reflects both the estimated fiscal charges and dealing costs that may be incurred by the Sub-Fund and the estimated bid/offer spread of the assets in which the Sub-Fund invests. This maximum amount will not vary even in case of change in market conditions (i.e. it will not be increased in unusual market conditions). The adjustment will be an addition when the net movement results in an increase of all shares of a Sub-Fund and a deduction when it results in a decrease.

Both Sub-Funds are in scope of swing pricing and for both Sub-Funds, no swing pricing was applied during the period ended 30 June 2025.

Notes to the Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

(I) Use of Estimates

The preparation of the financial statements in conformity with the Luxembourg legal and regulatory requirements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. The Board of Directors of the SICAV may also disclose certain contingent assets and liabilities at the date of the financial statements which can affect income and expenses during the reporting period. Actual results could differ from those estimates.

3. Fees

(a) Management Fees

The SICAV remunerates the Management Company, the Investment Manager and the Distributor for their services out of an aggregate management fee, which is payable monthly in arrears and accrued as of each valuation day.

Fundsmith Equity Fund	1.00%	0.90%	1.50%
Fundsmith Sustainable Equity Fund	1.00%	0.90%	1.50%

During the period under review, the SICAV did not have any transactions falling into the scope of the Securities Financing Transactions Regulation.

Appendix II – Risk Information

As part of the risk-management process, the global exposure of the Sub-Funds is calculated using the relative value at risk ("VaR") approach. The benchmark used for the purpose of the calculation is MSCI World Index. The expected level of leverage for the Sub-Funds, calculated on the basis of the sum of the notionals, is 100% of the net asset value, although higher levels of leverage are possible.

VaR is calculated in the Sub-Fund's currency using historical methodology with a one-year look back, 0.9950 decay, 20 day time horizon and 99% confidence interval.

The following table presents the level of leverage employed during the six months to 30 June 2025 and the lowest, highest and average utilisation of the VaR limit calculated during the same period:

	Leverage		Average utilisation of VaR limit
