Investment Objective of the Master Fund

The investment objective of the Master Fund is to achieve long term growth in value.

The Master Fund will invest in equities on a global basis. The Master fund's approach is to be a long-term investor in its chosen stocks. It will not adopt short-term trading strategies.

The Master Fund has stringent investment criteria which the Management Company, as investment manager of the Master Fund, adheres to in selecting securities for the Master Fund's investment portfolio. These criteria aim to ensure that the Master Fund invests in:

- high quality businesses that can sustain a high return on operating capital employed;
- businesses whose advantages are difficult to replicate;
- businesses which do not require significant leverage to generate returns;
- businesses with a high degree of certainty of growth from reinvestment of their cash flows at high rates of return;
- businesses that are resilient to change, particularly technological innovation;
- businesses whose valuation is considered by the Master Fund to be attractive.

Investors should be aware that the application of these investment criteria significantly limits the number of potential investments for the Master Fund's portfolio. It is envisaged that the investment portfolio of the Master Fund will be concentrated, generally comprising between 20 and 30 stocks.

The Master Fund will not invest in derivatives and will not hedge any currency exposure arising from within the operations of an investee business nor from the holding of an investment denominated in a currency other than sterling.
